UNAPOLOGETICALLY CHARM-ING

We all can't stop accessorising our accessories, whether that means charmed-out bags, shoes, caps, jewellery, or even apparel. It's charm-land everywhere you see on the runway, with layered and symbolic pieces. Add personalised charms to your necklaces and bracelets to liven up your day-to-day styling.

HEAD-TO-NECK

A humble accessory comeback — one of this season's most-worn extras is the classic cap. The staple piece adds an instant cool factor to everything from an overcoat, a shirt and tie, mini dresses and just about anything from day to night. Take tips from street style stars and serve up a cap + scarf combo.

TOP IT UP

What's better than one bag? Well... two styled together. Stacking your tote with a micro purse – aka double-bagging with two (or even more) bags, on and off the runway is this season's biggest bag trend. Try it out with mixed silhouettes and shades.
